

Selling Points for

Kick, Push/Pull, Mop & Armor Plates

Trimco supplies 300 series (type 304) Stainless steel on all stainless steel kick, push/pull, mop and armor plates.

The above items may also be available in 443 material (Trimco 630NN) this material does not meet B.H.M.A. It is not suitable for public buildings.

Trimco kickplates are also provided in brass, bronze, aluminum and CuVerro materials. We also provide clear plastic and Wilsonart plastics. 5 colors of Wilsonart are stocked, they are: Khaki brown, beige, dove grey, frosty white, and black.

Trimco standard kickplates are provided with 14 holes to allow the kickplate to fit closely to the door. Our competitors have only 12 punched holes.

All Trimco plates are provided with a pencil bevel on all four sides. This means that the bevel supplied is about the same width as the lead on a sharpened #2 pencil.

Trimco offers the following options for the above plates: Heavy Bevel, countersinking, Security screws, TEK self tapping screws, and UL labels, (there is an additional charge for each option).

Trimco kickplates are provided with sufficient packaging to prevent damage while in shipment. A wood frame is provided for armor plates. All shipments are labeled as fragile.

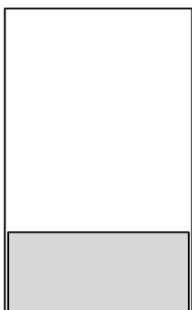

Trimco plates are stocked in both Los Angeles CA and Elizabethtown PA.

Trimco supplies 16 screws with each standard size kickplate. This is 2 extra than are needed to mount the plate to the door. The standard screws are: #6 X1/2" long truss head, Phillips head screws (for wood and sheet metal). These screws are undercut to allow them to fit close to the kickplate.

Many finishes may be supplied with Trimgard antimicrobial coating. Please contact your local sales agency to explain the significant differences of effectiveness between CuVerro and Trimgard.

The standard pricing varies with the metals market. Call the factory for current pricing. Other discounts do not apply. Orders of \$1000 net will qualify for freight allowed. On occasion Trimco will run an unadvertised special on quantity (100 per size) purchases of standard kickplates. Contact our sales manager for details.

Trimco Kick plates are in a class of their own... Not just a commodity, rather an engineered product.
