

New From Trimco

Edge Mounted Fire Bolt

No More Holes in the Floor on Pairs of Fire Doors!

Bolt Projection	1"
Door Prep	1" x 13/4" x 5/64"
Strike Prep	1" dia. x 13/4" deep
Activation Temperature	450 degree F
Activation Force	3.5 lbs
Finishes	All

Designed for use in conjunction with an automatic flush bolt or self-latching flush bolt at the top of a pair of fire doors, and the 3850 mounted in the lower edge of the fire door pair. The 3850 can also be used in conjunction with a vertical rod exit device.

The 3850 offers an alternative to a bottom automatic or bottom self-latching flush-bolt where a hole in the floor is undesirable, or, in the interest of removing obstructions to the wheelchair-bound, allows omission of a bottom rod on an exposed vertical rod exit device.

THIS DEVICE IS DESIGNED TO ACTIVATE ONLY IN THE EVENT OF A FIRE.
